URBAN GOVERNANCE PROJECT

Why the disability attention is important?

1

Kennedy has the highest percentage of disability registered in the city (13.4%), followed by other localities such as Bosa (10.0%) and Suba (7.7%).

2

It is a very important possibility to work around in the closing of the existing gaps.

3

We believe that the completion of this process will contribute to the dignity of the population directly related to its execution.
